PROFESSIONAL SUMMARY

Game Developer with 4+ years of professional experience specializing in Unity and mobile game development. Experienced in designing, implementing, and optimizing 2D mobile games from prototype to production. Skilled in gameplay programming, system architecture, performance optimization, and maintaining legacy codebases. Additional experience in developing interactive playable advertisements and rapid game prototyping for marketing campaigns and user acquisition initiatives.

SKILLS

- Unity engine
- Version control (Git)
- C#
- VS Code
- SOLID principle
- Unitask
- Luna Playworks
- DOTween

EDUCATION

University Of The East
Manila • 03/2020

Computer Engineering

WORK HISTORY

HPL Gamedesign Corp – Unity Game Developer
Remote • 03/2025 – Present

- Built Luna playable ads with different iterations and variants, both for 2D and 3D.
- Quick turnaround of task, typically completed within 2-3 days.
- Polished UI and animation feedback and making sure the playable is responsive to different screen sizes for mobile.
- Optimized the playable to fit in the minimum 5mb builds.

PlayStudios Orion - Unity Developer
Remote • 07/2025 – 03/2026

- Built prototype gameplay features for a live mobile game.
- Implemented new UI systems and enhanced existing UI functionality, including animations.
- Developed immersive features that improved player engagement and game feel.
- Maintained and enhanced large legacy Unity/C# codebase.

ThinkBIT Solutions Inc. - Unity Game Developer
Remote • 01/2024 - 04/2025

- Implemented gameplay mechanics and interactive elements for an indie game title using C#.
- Developed 2D mobile games in Unity for Android and iOS platforms.
- Collaborated effectively with designers, artists, and QA testers to enhance game functionality.

Taktyl Studios - Junior Game Developer
Remote • 04/2022 - 01/2024

- Implemented multiplayer systems using Photon PUN for legacy systems in C#.
- Developed and maintained JavaScript API endpoints and implemented REST API integration on the client side using Unity (C#) for player and game-state data.
- Integrated PlayFab to streamline player data storage and retrieval processes.
- Programmed comprehensive UI systems and in-game interactions with animations.
- Managed Android and iOS builds to ensure cross-platform functionality.

Ntek Systems Inc. - **Unity Programmer**
Remote • 09/2021 - 04/2022

- Maintained and expanded existing Unity C# scripts and scenes.
- Addressed integration testing feedback and implemented new features to systematize development workflows.
- Collaborated with team members to resolve bugs and improve code quality using best practices.
